PROJECTS

Interactive Webpage Project (Frontend Mini Project)

Created a user-interactive page using JavaScript DOM manipulation

Features include: background colour picker, image toggle and greeting with confetti effect and sound

 GitHub: github.com/jaswanth1013/interactive-webpage

 Live Demo: <https://jaswanth1013.github.io/Interactive-Webpage/>

Pixel Mascot Landing Page

Built a clean and responsive landing page from a Figma design using HTML & CSS

Practised layout, Flexbox and responsiveness

 GitHub: <https://github.com/jaswanth1013/pixel-landing>

 Live Demo: jaswanth1013.github.io/pixel-landing

Personal Portfolio Website

Built a fully responsive personal portfolio to showcase my frontend projects and skills.

Structured clean sections: Hero, About, Projects, Skills, and Contact.

Focused on semantic HTML and modern CSS design with no frameworks or images used.

 GitHub: <https://github.com/jaswanth1013/Portfolio>

 Live Demo: jaswanth1013.github.io/Portfolio
