Summary

Detail-oriented and proactive developer with a solid foundation in computer science and hands-on project experience in HTML, CSS, JavaScript, React.js, Java, and SQL. Certified in Full Stack Java, JavaScript, Java, and React.js, with practical experience gained through internships and personal projects. Passionate about creating scalable, user-friendly web applications and committed to continuous learning and effective documentation.

Experience

AGS Health - Trainee Process Associate
Hyderabad, India
12/2024 - 05/2025

- Worked in healthcare RCM process ensuring accurate claim handling.
- Maintained data quality and process compliance.
- Collaborated with team members to meet daily targets.

Infoz IT solutions - Intern
04/2024 - 06/2024

- Focused on practical development, building a strong base in modern JavaScript and UI design principles.
- Gained exposure to the overall structure of Full stack projects, understanding how the front-end interacts with a backend.
- Practiced version control (Git/GitHub) for managing code changes, collaborating and tracking progress on front-end assignments.

Learning Tree - Intern
04/2023 - 07/2023

- Worked with a team to tackle coding challenges, learning Java fundamentals.
- Participated in group coding tasks, discovering Java technologies.
- Collaborated on programming exercises, gaining exposure to Java and development tools, strengthening problem-solving skills.
- Explored some other HTML and CSS technologies with the support of my team.

Project 1

Personal Portfolio Website
- Built a fully responsive personal portfolio to showcase my frontend projects and skills.
- Structured clean sections: Hero, About, Projects, Skills, and Contact.
- GitHub: https://github.com/jaswanth1013/Portfolio
- Live Demo: jaswanth1013.github.io/Portfolio

Project 2

React To-Do List Application
- Built a responsive and interactive To-Do List web application using **React.js**.
- Implemented features such as task creation, completion toggling, and deletion using **React Hooks** (useState, useEffect).
- Focused on component-based architecture for scalability and maintainability.
